

Powering our Communities

The **Community Energy South** discussions

Communities are now playing an important part in the big energy debate and the government is listening. Community Energy South have organised four events across the region between the 19th and 29th of September to help communities:

- ▶ set-up or join an existing local community energy group
- ▶ tackle fuel poverty across our region
- ▶ plan for a low carbon future
- ▶ generate locally owned energy and use it more efficiently
- ▶ create local, green-growth jobs

The **FREE Powering our Communities** events provide information for community groups, local authorities, individuals and businesses that want to develop a low carbon, energy efficient community.

Assembly Rooms Chichester

September 23 11am - 5pm
